CPI: 7.82

Courses

- Information Technology

12th Board

New Leap International Science College, Modasa

06/2019 - 04/2020

Modasa, Gujarat

WORK EXPERIENCE

Mess Mate (03/2022 - 04/2023)

- Position : Team **Leader**.
- Developed a website for hostel mess during HACKVGEC hackathon
- During the mess mate project, I played a key role as a backend engineer, leveraging my skills and experience to design and implement the server-side functionality of the website.
- Specifically, I was responsible for ensuring the seamless integration of various components and features, including the database management system, user authentication and authorization. Through my contributions, we were able to create a robust and reliable platform that met the needs of our users and delivered a high-quality experience.

Jan Suvidha Portal (09/2022 - 02/2023)

- Position : Team Member as a Backend Engineer.
- We have created a Web application using **PHP, MySQL, and Bootstrap** to create a portal for Government Schemes where users can register and apply for any eligible government scheme and can also get information about various government schemes.
- We make the process smooth for applying and then tracking of users who have applied for the various Schemes.
- [Application Link](#).
- We were Finalist of **Azadi Ka Amrit Mahotsav Hackathon 2022**.

iNotes (08/2022 - 09/2022)

- I have created a Basic Notes taking Web Application using **PHP, MySQL, Bootstrap** and Some **JQuery Plugins**.
- [Application Link](#).
